Noto Sans Canadian Aboriginal (NotoSansCanadianAboriginal-Regular.ttf from Noto-hinted)

A test to show Canadian Aboriginal syllabic scripts. The English text in this document is set in Noto Sans because the main fonts often do not cover English. As before, this is Article 1 of the UDHR.
Source:
http://unicode.org/udhr/assemblies/first_article_all.html

This document was prepared using xelatex and fontspec. Depending on the font, missing glyphs will be replaced either by nothing at all (occasional fonts do that), a blank space, an empty box, or some other symbol indicating a missing glyph.

1   Northwestern Ojibwa

The text from which I pasted this contains common full-stops, perhaps erroneously, but wikipedia implies that some Canadian Aboriginal languages use regular full-stops so I have used Not Sans for the full-stops.
