Nazli (nazli.ttf from fonts-farsiweb_0.4)

This persian font covers English, Arabic and Farsi. For variations of the latin, cyrillic, and greek alphabets I attempt to show the whole alphabet, followed by Article 1 of the UDHR (it is traditional!). For the other scripts and languages I merely display the digits (if not common 0..9) and Article 1.

This document was prepared using X∃LᴬTᴇX and fontspec. Depending on the font, missing glyphs will be replaced either by nothing at all (occasional fonts do that), a blank space, an empty box, or some other symbol indicating a missing glyph.

1 Right to Left Scripts

1.1 Arabic

0123456789 ٠١٢٣٤٥٦٧٨٩

يولد جميع الناس أحرارًا متساوين في الكرامة والحقوق. وقد وهبوا عقلاً وضميرًا وعليهم أن يعامل بعضهم بعضًا بروح الإخاء.

1.2 Farsi

0123456789 ٠١٢٣٤٥٦٧٨٩

تمام افراد بشر آزاد بدنیا میایند و از لحاظ حیثیت و حقوق با هم برابرند. همه دارای عقل و وجدان میباشند و باید نسبت بیکدیگر با روح برادری رفتار کنند.

2 Quotation-marks, etc.

In real-world usage, particularly when looking at news sites, the presence or absence of the correct quote characters will make a difference. As a coder, I use ASCII-style single or double quotes which are not present here: this font only supports guillemets «...» and angle quotes ‹...›
