Monospace fonts which I believe are Sans-Serif (some add serifs to i and l to make them distinct, PT Mono adds serifs on 'T'). The random text is from http://catipsum.com/ but I have preceded it with a line of characters used in coding. I have now attempted to order these by size (length, then apparent height or weigh)t but the order is only approximate. I preppared this in libreoffice, the apparent weight varies with the zoom factor.
